

LA21

Presentation:

Compact vertical line array element designed to provide high performance, detailed highs and a well-defined midrange. The LA21 is a front loaded enclosure, curvilinear array, that features an internal passive crossover, prepared for bi-amp operation, having built-in premium quality EU transducers (2x 10" - 2.56in VC) and 1x 1.4" - 2.56 VC Neodymium HF drivers, both combinations ensuring powerful and crystal clear reproduction, high SPL with an extended frequency response. The MF/HF pattern control is array splay dependent and horizontal coverage is 100° x array length-splay dependent (HXV) thanks to true wave guide horn that ensure consistent and long range projection with very low distortion levels.

LA21 rugged enclosure is manufactured using 15/18mm birch plywood painted in hard-wearing and durable polyurea coating, equipped with fully integrated rigging hardware with quick-release bolts/pins to ensure fast and easy setup, designed for flying and ground stacking applications providing the necessary accessories such as fly bars and dolly/carts for transportation.
