SCHOEPS DUAL STAND CLAMP SG 22 MOD

for two microphones of 20 mm diameter (e.g. CMC, CMD or CMBI)

Cena:
Kategorie: Audio, Mikrofony

OPIS

Holds two microphones with 20 mm diameter in parallel alignment. Their distance can be varied from 4 mm to 52 mm, while they can be oriented parallel to the stand, perpendicular to the stand, or at any angle in between.

Certain ”near-coincident” microphone arrangements for stereo recording can be created in

this way. With a pair of CMC amplifiers placed upright side by side, laterally-addressed Colette directional capsules (the MK 4V, MK 41V, MK 6 and MK 8) can be used with any desired angle set between their main axes. The other directional capsules (the MK 4, MK 41 and MK 5) can be used with GVC angle adapters; even some coincident microphone setups are then possible.
